

## Business Description

Various accounts in each country, smooth opening Name: SLAY TOKEN

### Introduction:

The developed SLAY TOKEN is a cryptocurrency generated on the WX NETWORK. SLAY TOKEN is a currency that can be exchanged for various services and other cryptocurrencies through the WX NETWORK.

### Main uses:

Applications are active in various places.

General specifications of SLAY TOKEN

Official name: SLAY TOKEN

Total issued number: 100,000,000

Decimals: 8 digits

SLAY TOKEN is a token developed on the WX NETWORK platform (ERC20 compatible). WX NETWORK is a blockchain-based platform that uses its own cryptocurrency, the WX NETWORK token. The features and functions of the WX NETWORK platform are described below.

1. High scalability: The WX NETWORK platform is characterized by high scalability. It has a high transaction processing speed and has the ability to process more than 1000 transactions per second. This enables smooth transaction processing even for large users and applications.
2. Create Custom Tokens: The WX NETWORK Platform allows you to create your own custom tokens. Custom tokens are used to represent unique digital assets for projects and applications. WX NETWORK token has its own token standard, easy creation process and low fees.
3. Decentralized Exchange (DEX): The WX NETWORK platform has an integrated Decentralized Exchange (DEX). You can trade WX NETWORK tokens and other custom tokens through DEX. Unlike centralized exchanges, DEXs offer enhanced security and privacy as well as transparency and safety of transactions, as they allow users to trade while retaining ownership of their assets.
4. Smart Assets: The WX NETWORK platform also allows the creation of tokens called smart assets that have some functionality of smart contracts. Smart Assets have programmable conditions and behaviors and are used, for example, to develop decentralized applications (DApps) and smart contracts.

5. Wallets and Browser Extensions: The WX NETWORK platform provides official wallet software and browser extensions. By using these tools, you can utilize various functions such as storing, sending and receiving WX NETWORK tokens, and trading on DEX.

industry and market

[Regarding overseas bank remittance]

The most inconvenient thing in the world is sending money abroad. Problems are the difficulty of procedures, remittance fees, and the time it takes to receive money. We have considered this big problem as a challenge. The great thing about cryptocurrencies is that they can solve this all at once. Banks around the world are also showing interest in this blockchain technology. First of all, there are countries in the world where foreigners can open an account and countries where they can't. Even if you can open an account, the procedure is very difficult. Even after opening, there are many difficulties due to the various operating methods that are different from those of banks in the home country.

After opening an account, even if you transfer money to the bank, it will take 3 to 4 hours to complete the transfer procedure in an unfamiliar country. It is true that the remittance fee is also very high. Furthermore, after the remittance procedure is completed, it will take some time for the money to arrive. It takes 3 days at the shortest, 2 months in some countries, and 3 months in some countries.

I think it will be easier to understand if you think about when you actually send money in your own country. The convenience will increase if the procedure is simple, the fee is cheap, and the time is immediate. From the perspective of country risk and fund preservation, more and more people are making deposits outside their home country. The first thing we thought about was speed (time reduction), and the second was the transaction fee. Cryptocurrency is the solution when considering this point. Remittances can be made in as little as 15 seconds, and transaction fees are low. Very attractive part. Considering the procedure for opening an account there, we will start a support service for opening a bank account as a pioneer. I am confident that with this support, everything will be fulfilled. It is a service that can be easily used by anyone at any time. He believes that by running this service, the SLAY TOKEN we have issued will be very active.

[New economic zone]

Digital financial assets continue to evolve at an accelerated pace due to the spread of blockchain.

Among them, countries such as Russia and China are building their own huge economic zones that do not depend on the dollar or SWIFT.

In this new economic zone, the project aims to: It facilitates bridging between financial institutions and individuals around the world. Liberate the financial system from being

limited to centralized regions, demographics and political backgrounds. Individuals then make their own choices. This will be an integrated project to assist asset conservation and asset formation in all areas of the world.

What will happen if a platform that integrates all financial institutions and individuals around the world is born? It will be a project that allows you to make more free and strategic choices than now.

In the future, if such attempts succeed, we will be freed from the restrictions of the state and various restrictions, and an era will soon be upon us in which all kinds of assets (including works of art and precious metals) can be freely exchanged via digital platforms increase.

We are approaching the largest Russian bank, which is undergoing the most innovative and dynamic reforms in this sector. In addition, the existing Singaporean financial platform service (non-CRS) can open an account with SLAY TOKEN for all people around the world.

Roadmap:

First period

Singapore, multi-currency account with debit card

Account features (as of May 2023)

- Licenses in Singapore, Canada and Hong Kong
  - You can open an account online
- Multi-currency account (JPY, GBP, USD, EUR)
- Payment is available 24 hours a day, 365 days a year

Second term. Russia

Approached the largest bank

- Multi-currency account
  - Issuance of digital assets
  - Digital Ruble
  - Crypto/FIAT Exchange
  - CRS non-target
  - Exclusive card issuance
- Expect a wide variety of services

### Phase 3 Laos

Online service linked with the largest banks

Internet commentary available

A VISA debit card is issued to open an account, and you can withdraw money at ATMs in each country for shopping.

Asset management and Bitcoin charge to VISA debit card can be performed by linking bank account.

### 4th Phase Cambodia

It was established as a nongovernmental organization to support small and medium-sized enterprises as a project for income improvement and job creation by the United Nations Development Programme and the International Labor Organization. In October 2000, the company transitioned to a specialized bank, and in December 2003, acquired a license as a full-fledged commercial bank. As the largest bank in Cambodia, it is the market leader.

### Fifth Phase Casino Collaboration

\*Note: The schedule and contents of the roadmap are subject to change.

### Disclaimer

This document is for informational purposes only and does not constitute an offer to sell shares or securities.

should not be viewed as SLAY TOKEN does not grant control. Owning a SLAY TOKEN does not give the owner any ownership or property rights in his SLAY TOKEN Project. SLAY TOKEN does not entitle the owner to participate in decision-making regarding the development of her SLAY TOKEN Project, although it can consider public opinion and feedback. You can use SLAY TOKEN to purchase products on the platform at special prices and participate in the SLAY TOKEN Project loyalty program.

### \*No guarantee of income or earnings

Examples of income and profit calculations used in this document are given for illustrative purposes only or to show industry averages and are not a guarantee that these results will be obtained in accordance with your marketing plan.

### \*Regulatory uncertainty

Blockchain-related technologies are overseen and controlled by various regulatory bodies around the world. Use of SLAY TOKEN and other actions related to them may be illegal in the investor's jurisdiction. It is imperative that the participant understands that he will take all risks associated with the project and will not be indemnified by the team. This is especially true for residents of the United States, China, Singapore, South Korea and many other countries that have already introduced legal restrictions on cryptocurrencies. Residents of these jurisdictions are strongly encouraged to participate in the Token Sale.

\*SLAY TOKEN is not an investment

SLAY TOKEN is not a public or legally binding investment of any kind. Due to unforeseen circumstances, we may modify the purposes stated herein. Despite striving to achieve all goals set forth in this document, all persons and parties involved in purchasing SLAY TOKEN do so at their own risk.

\* Quantum computer

Technological innovations like the development of quantum computers could pose risks to cryptocurrencies, including the SLAY TOKEN.

\*Risk of loss of funds

Funds collected during the token sale are never insured. There is no private or public insurance agent that customers can reach out to when they are lost or worthless.

\*Risk of failure

The potential failure of all marketing activities involving funds collected during the SLAY TOKEN Project platform and subsequent ICO proceedings may be subject to a variety of factors including, but not limited to, failure of industry arrangements or marketing strategies. It is possible for a reason.

\*Risk using new technology Cryptographic tokens like SLAY TOKEN are relatively new and relatively untested technology. In addition to the hazards mentioned in this document, there are additional hazards that the SLAY TOKEN Project team cannot foresee.

These hazards are not specified in this document and may arise in other circumstances.

\*Disclaimer of warranty

You understand and agree that your use or inability to use SLAY TOKEN is at your own risk.

The customer shall release the SLAY TOKEN Project's platform from any liability. Once issued, SLAY TOKEN are sent to you without any express or implied warranties, including, but not limited to, the implied warranties of merchantability, fitness for a particular purpose, and non-infringement.

Some jurisdictions do not allow the exclusion of certain warranties. Therefore, some of the above exclusions may not apply to you.
